METAMASK

What is MetaMask?

- MetaMask is one of the leading self-custody crypto wallets and is essentially a software application that functions like a digital bank account for cryptocurrencies. It allows for the storage, sending and receiving of digital currencies and assets
- Due to the technical specifications of MTC tokens, particularly their relation to the ERC-1400 token standard, only the MetaMask wallet is currently suitable for managing MTC tokens

Installation

- In our example, we will install the MetaMask wallet on a Windows PC. MetaMask can also be installed on a mobile phone, but we recommend using a computer for better visibility and handling
- Open your browser. In our example, we use Google Chrome
- Visit the MetaMask website by entering the official URL (web address) in the address bar:
<https://metamask.io>

A crypto wallet & gateway to blockchain apps

Start exploring blockchain applications in seconds. Trusted by over 100 million users worldwide.

Get MetaMask

● Once the website is open, click the "Get MetaMask" button at the top right

Receive our newsletter

Sign up for our newsletter to learn more about MetaMask and the benefits of web3

Email address **Subscribe**

MetaMask may use the contact information you provide to us to contact you about our products and services. By clicking "subscribe" you consent to receive such communications. You may unsubscribe from these communications at any time. For information on how to unsubscribe, as well as our privacy practices and commitment to protecting your privacy, please review our [Privacy Policy](#).

This site is protected by reCAPTCHA and the Google [Privacy Policy](#) and [Terms of Service](#) apply.

Install MetaMask for your browser

Install MetaMask for Chrome

● Scroll down slightly and select the browser you are currently using and where the MetaMask extension will be installed. In our example, we select **Chrome**

Supported Browsers

Add "MetaMask"?

It can:

- Read and change all your data on all websites
- Display notifications
- Modify data you copy and paste

Add extension Cancel

- Then click **"Add extension"**
- The installation of the extension may take a few seconds. During this time, avoid clicking anything and do not close the browser until the display changes

Overview

An Ethereum Wallet in your Browser

A secure wallet and gateway to blockchain sites

Whether you are an experienced user or brand new to blockchain, MetaMask helps you connect to the decentralized web: a new internet.

- After about 5–20 seconds, the MetaMask extension should be downloaded. Once completed, a new browser tab will open automatically with the start page of the wallet installation
- Read the MetaMask **terms of use** and agree to them
- Then click on **"Create a new wallet"**

Let's get started

Trusted by millions, MetaMask is a secure wallet making the world of web3 accessible to all.

I agree to MetaMask's [Terms of use](#)

Create a new wallet

Import an existing wallet

Help us improve MetaMask

We'd like to gather basic usage and diagnostics data to improve MetaMask. Know that we never sell the data you provide here.

[Learn how we protect your privacy while collecting usage data for your profile.](#)

When we gather metrics, it will always be...

- ✓ **Private:** clicks and views on the app are stored, but other details (like your public address) are not.
- ✓ **General:** we temporarily use your IP address to detect a general location (like your country or region), but it's never stored.
- ✓ **Optional:** you decide if you want to share or delete your usage data via settings any time.

We'll use this data to learn how you interact with our marketing communications. We may share relevant news (like product features).

We'll let you know if we decide to use this data for other purposes. You can review our [Privacy Policy](#) for more information. Remember, you can go to settings and opt out at any time.

● Familiarize yourself with the additional terms of use regarding privacy and data protection at this step. Select optional settings as desired, then click on "I agree"

- Next, create a strong **password** and confirm it by re-entering
- Read the additional information about password recovery
- Check the **confirmation box** and then click on "**Create a new wallet**"

1 2 3

Create a new wallet

- ⚠ Security notes:**
- Always store your passwords in a secure location and never share them with others
 - Neither MetaMask nor Monetec GmbH will ever ask for your passwords

Secure your wallet

Before getting started, watch this short video to learn about your Secret Recovery Phrase and how to keep your wallet safe.

- Remind me later (not recommended)
- Secure my wallet (recommended)**

What is a Secret Recovery Phrase?

Your Secret Recovery Phrase is a 12-word phrase that is the “master key” to your wallet and your funds

How do I save my Secret Recovery Phrase?

- Write down and store in multiple secret places
- Store in a safe deposit box

Should I share my Secret Recovery Phrase?

Never, ever share your Secret Recovery Phrase, not even with MetaMask!

If someone asks for your recovery phrase they are likely trying to scam you and steal your wallet funds.

● Now, carefully read the information provided below, watch the informational video and then click on **"Secure my wallet (recommended)"**

- You are now one step away from revealing your recovery phrase. The recovery phrase is the ultimate "key" to your MetaMask wallet and your assets. As the name suggests, the recovery phrase allows you to restore your wallet in the event of loss or damage to the device on which the wallet is installed
- In the next step, you must save this 12-word phrase and store it securely. Now, click on "**Reveal Secret Recovery Phrase**" to proceed

1 — 2 — 3
Create password — Secure wallet — Confirm secret recovery phrase

Write down your Secret Recovery Phrase

Write down this 12-word Secret Recovery Phrase and save it in a place that you trust and only you can access.

Tips:

- Write down and store in multiple secret places
- Store in a safe deposit box

👁

Make sure nobody is looking

Reveal Secret Recovery Phrase

⚠ Security note:

- Before revealing the recovery phrase, make sure that no one can see your screen or has access to it – especially through screen-sharing services like Zoom, Google Meet or similar connections

⚠ Security note:

- Unlike the set password, which allows everyday access to your wallet and can be reset upon reinstallation, this is not possible with the recovery phrase. It is your responsibility to keep the 12 words safe. Neither MetaMask nor Monetec GmbH can recover the 12 words

- You will now see your recovery phrase, which typically consists of 12 english words in MetaMask. Write down all **12 words** in the correct order
- After you have written down all the words correctly, click **"Next"**

1 — 2 — 3

7. word	8. word	9. word
10. word	11. word	12. word

[Hide seed phrase](#) [Copy to clipboard](#)

Next

⚠ Security notes:

- Always store your 12 words in a secure place and never share them with others. Anyone with access to your phrase also has access to your wallet and assets – **"Not your keys, not your coins"**
- Neither MetaMask nor Monetec GmbH will ever ask for your 12 words
- Double-check to ensure each word is written correctly and in the correct order. This is extremely important
- We recommend not storing the 12 words on digital media, not taking screenshots or doing anything similar. We advise using a simple sheet of paper

- After noting down your 12 words, MetaMask provides a **verification step**. You must now enter a selected number of words to confirm that you have recorded the phrase correctly
- Usually, the **third, fourth** and **eighth** words are requested at this step
- Once you have entered the missing words, double-check again that all 12 words are correct, then click on **"Confirm"**

1 Create password 2 Secure wallet 3 Confirm secret recovery phrase

● You will now see the main view of the MetaMask wallet. The installation is now successfully completed!

The background is a vibrant, abstract digital composition. It features a dark teal base color, overlaid with numerous glowing orange and yellow particles of varying sizes, some appearing as soft bokeh. A network of thin, light blue lines connects various points, creating a sense of connectivity and data flow. In the center, there are large, flowing, ribbon-like structures in shades of orange and yellow, which seem to pulse and move. The overall effect is one of high-tech energy and digital complexity.

Copying the receiving address

The screenshot shows the MetaMask wallet interface. At the top, the MetaMask logo and name are visible. Below that, the network is set to "Ethereum Mainnet". The account name is "Account 1" with a dropdown arrow. Below the account name, the address "0x51936...e3E3e" is displayed with a "Copy to clipboard" button. The main display shows "0 ETH" with a value of "\$0.00 USD" and a portfolio link. Below this are icons for "Buy & Sell", "Swap", "Bridge", "Send", and "Receive". The interface also includes tabs for "Tokens", "NFTs", and "Activity". A blue banner at the bottom says "Fund your wallet" with a "Get Started" button. On the left, there is a section for "Ethereum • Stake" with a "-2.10%" change, and links for "Import tokens", "Refresh list", and "MetaMask support".

⚠ Security notes:

- It is absolutely essential that you provide your exact receiving address during the subscription process. Transactions are irreversible, and an incorrectly entered receiving address will result in the loss of the corresponding tokens
- If you need assistance or have questions, contact us at contact@monetec.io

- Open your text editing program one last time
- Ensure that the address you just entered in the field matches 100% with the two addresses in your text editing program – every letter, every number
- Once you have confirmed that your receiving address is correct, you can proceed with the subscription process. You have now successfully copied and pasted your address!

Importing MTC tokens

MTC is an Ethereum-based ERC-1400 security token that will give profit sharing rights to its holders tied to the net profit* of the Monetec company, enabling more individuals to invest in high-value projects. This broadens access to investment opportunities that were previously limited to small groups of very wealthy investors. Moreover, the inherent security features of blockchain technology safeguard transactions, reducing the risk of fraud and enhancing investor confidence. The immutable nature of blockchain ensures that every transaction is recorded transparently, facilitating easier oversight and greater trust among investors. This is further supported by strict regulatory oversight from authorities, which enforces a robust legal framework to prevent fraudulent activities and protect investor interests.

Binance Smart Chain

Keep in mind:

- Gas is BNB**
The native token on this network is BNB. It is the token used for gas fees.
- Bridge, don't send**
You may lose your assets if you try to send them from another network. Transfer funds safely between networks by using a bridge, like [MetaMask Portfolio](#).

Learn to bridge

- The display will change, and you will now be in the Binance Smart Chain network view. The network has been successfully added!
- In the list of your assets, you will now also see the BNB token – the native currency of the Binance Smart Chain blockchain, similar to how Ethereum (ETH) is the native currency of the Ethereum blockchain. Transaction fees for activities on the Binance Smart Chain blockchain are paid in BNB. Your BNB balance should currently be zero
- In the next step, the actual **USDT token** must now be added. To do this, click again on **" + Import tokens "**

- A small window will open again. Click on **"Search"** at the top left (usually selected by default)
- Enter **"USDT"** into the search field
- Select **"Tether USD"** by checking the box (this is usually the first result)
- Click on **"Next"**

Next

- As with adding the MTC token, you will now see the Tether USD token displayed again, which you want to import into your wallet
- The amount of USDT should generally be zero unless you are adding USDT directly after wallet installation and not at a time when profit distributions may have already occurred
- Click on **"Import"** again

Token imported
You've successfully imported USDT.

- The display will now return to the main view. In the list of your assets, you will now see Tether USD listed as a new position
- Whenever profit distributions occur, the balance shown on the right will increase. You can then convert the Tether USD into fiat currency via an exchange or another platform, withdraw it or reinvest it if desired. The further use is entirely up to you
- The USDT token has now been successfully added to your wallet!
- To easily switch between networks, for example, to return to the Ethereum network where your MTC tokens are stored, click on the "Binance Smart Chain" button at the top left

- Finally, we would like to give you some basic **tips** for handling your MetaMask wallet
- First, we recommend logging out of MetaMask after each use, just as you would log out of an online banking account
- To do this, click on the **three-dot icon** at the top right in the main view
- A small window will open; click on **"Lock MetaMask"**

- You have successfully logged out of your MetaMask wallet!
- By re-entering your **password** (the password you set during installation), you can log back into your wallet. To do this, click on the **"Unlock"** button
- If you do not plan to use the wallet for the time being, you can simply close the browser tab or the entire browser

- Whenever you open your browser in the future where the wallet is installed, you will see the small **fox icon** in the toolbar at the top right. If you want to open your wallet, simply click on this icon
- The compact view of the MetaMask wallet will then open
- Enter your **password** as usual here and click on **"Unlock"**

- Once you have logged in, you will see the main view of your wallet in compact form
- You can use the MetaMask wallet in this compact view as usual; its functionality remains unchanged. However, for better visibility, we recommend always using the expanded view. To do this, click on the **three-dot icon** at the top right

- You will automatically be redirected to the main view. At the top center, you will now see that your account name has been updated according to your input
- You are now familiar with all the essential points for using the MetaMask wallet in connection with the Monetec project. Enjoy your experience! ;)

- ⚠ Security notes:**
- Finally, we would like to explicitly remind you to store your sensitive data securely. You alone are responsible for the safe storage of your sensitive data, passwords and recovery phrase
 - Never share your data with third parties. Neither MetaMask nor Monetec GmbH will ever ask for your sensitive data
 - Please also be cautious of potential phishing emails that, for example, claim your wallet software is outdated and needs to be updated, prompting you to click on a link – in 99.99% of cases, these are fraudulent attempts
 - If you have any questions, suggestions, feedback or need assistance, feel free to contact us anytime at contact@monetec.io. We look forward to hearing from you!

Legal notices and disclaimer

General information

The information provided in this guide does not constitute financial, legal or tax advice. This guide has been created to the best of our knowledge and belief to facilitate the subscription process and management of MTC tokens for investors, particularly for those with little or no prior experience with wallet technologies like MetaMask. It is explicitly stated that the information, representations or processes contained in this guide may be inaccurate, incomplete or outdated over time.

Scope of the guide and individual use cases

This guide exclusively covers the essential functions of MetaMask that are relevant to the Monetec project and MTC tokens. Specialized configurations, advanced functionalities or individual customizations are not addressed. For further information and specific functionalities of MetaMask, it is recommended to consult the official resources at <https://metamask.io> or contact MetaMask support.

Technological and legal developments

Blockchain technology and wallet providers such as MetaMask are subject to constant advancements. Despite our

best efforts to keep the information in this guide up to date, it cannot be guaranteed that every aspect included aligns with the latest versions or updates of the MetaMask software. Users are therefore encouraged to regularly review the official resources provided by the wallet provider.

Disclaimer of liability

The instructions and recommendations contained in this guide are general in nature. Responsibility for the use of the information described in this guide, as well as its application, lies solely with the user. Any liability, whether contractual or tortious, for direct or indirect damages, financial losses or damages arising from the use of or reliance on this information, is excluded to the extent permitted by law, including any warranties regarding returns or outcomes.

Security notice

Neither Monetec GmbH nor MetaMask will ever ask for your private keys, passwords or other sensitive data. It is strongly recommended to download MetaMask exclusively from the official website or app. If you feel uncertain during installation, use or regarding any other aspects – or if anything appears suspicious or unusual, particularly if someone asks for your data – please contact us immediately at contact@monetec.io. It is better to double-check a question than to risk a mistake. We are always available to help resolve any uncertainties together.

Risks of investing in cryptocurrencies

MetaMask is primarily an application for managing cryptocurrencies. Investing in cryptocurrencies involves significant risks and may result in the loss of your entire

invested capital. Cryptocurrencies are highly volatile and speculative; their value can fluctuate sharply and unpredictably. It is therefore strongly recommended that you conduct thorough research before making any investment decisions.

Tax implications

In addition to the risks mentioned, trading cryptocurrencies may have tax implications. It is the sole responsibility of the investor to familiarize themselves with and comply with applicable tax laws and regulations. For tax-related questions, a professional tax advisor should be consulted.

Technical errors and system failures

Monetec GmbH assumes no liability for technical errors, system failures or other disruptions that may impair access to the MetaMask wallet, the blockchain or the assets stored within. This includes, but is not limited to, delays, interruptions or the permanent unavailability of MetaMask or blockchain services.

Faulty transactions

Transactions carried out via MetaMask or other wallets are irreversible. It is solely the user's responsibility to verify the accuracy of transaction details. Any liability for faulty transactions, including incorrect entry of recipient addresses or token amounts, is excluded.

Liability for third-party software or services

If third-party services or software are used in conjunction with MetaMask, Monetec GmbH assumes no liability for their functionality, security or legal compliance. Users are encouraged to review the respective terms of use and security policies of third-party providers.

Privacy and security responsibility

The responsibility for protecting your private keys, passwords and other sensitive data lies solely with you. Any liability for damages caused by phishing attacks, security breaches or unauthorized access to your wallet is excluded. It is your responsibility to keep your security measures up to date. Recommended measures include using hardware wallets, enabling two-factor authentication, performing regular security checks and continuously updating wallet software, browsers and all programs connected to the MetaMask wallet.

Regulatory changes

It should be noted that the legal and regulatory framework for cryptocurrencies and blockchain technologies is subject to regular changes. It is the user's responsibility to ensure that cryptocurrency trading complies with applicable laws in their jurisdiction.

Acknowledgment of use

By using this guide, you confirm that you have read and understood all notices and the disclaimer. You agree that the use of this guide is at your own risk.
