# Whitepaper availability notice

Dear Friends,

We are currently in the process of revising our Whitepaper. This document provides a refined summary of our mission, goals and approaches. A Whitepaper is a detailed and authoritative report that explains the core aspects of a project or initiative. In our case, it outlines our mission, goals, strategies and the underlying technology.

While the Whitepaper offers a comprehensive overview of our project, it **does not contain** any information that isn't already available on our website or in our legal documents. Therefore, for precise and exact information, always refer to the legally binding [Terms and Conditions](#) and the [General Information for Consumers](#).

The Whitepaper simplifies the essential points but **does not introduce** any new or different information. Rest assured, you are not missing out on any crucial or essential details.

Thank you for your understanding and continued support.

Sincerely yours  
Team Monetec
